OPPENHEIMER-NIKKOR 8mm T3.2 ULTRA WIDE ANGLE LENS

An Ultra Wide Angle Lens designed to provide the widest possible angle of view for 35mm motion picture cinematography. The Oppenheimer version of the original Nikkor is mechanically a new lens. The lens is adjusted to fully cover a 35 Academy frame, and to cover a Super 35 frame out to a 1.78 image area. The angle of view of the Oppenheimer/Nikkor 8mm is significantly wider than that of a 10mm Zeiss. With the addition of an optional kit, your lens technician can reset the lens to the original Nikkor coverage which, while somewhat wider, vignettes just outside "TV Safe." The focus mechanism has been reworked to focus in the "correct" direction. The focus barrel is geared and marked in your choice of either feet or meters. A 40.5mm filter tray has been built into the lens, and the design will allow up to three 40.5mm filters. This is a uniquely capable lens, for your specialty and ultra wide angle needs..

Lens Composition: 10 elements, 8 groups, fisheye design.

Picture Angle: Nearly 180°

Minimum Focus: Less than 10 inches

Focus Scale: Available in Feet or Meters, please specify

Aperture Range: T3.2 - T22

Lens Mount: PL or BNCR mount

Filter Size: 40.5mm Internal and Rear Mount (Rear lock-out available)

Filter Note: Some mirror shutters may not allow rear filter, please check!

Size: 140mm (5.4 in.)

Weight: Approx 1100 gr.

PRICE: \$7,995.

OPPENHEIMER-ZEISS MAKRO-PLANAR® T* 60mm T3.2 LENS

A special lens characterized by optimum correction of aberrations apt to occur in photography at close distances. The design of this lens corresponds to that of an almost symmetrical Planar® lens, the correction of which is remarkably steady with changes of the image scale. Provides up to 1:1 magnification ratio without extension tube. The lens is complete with integral long-throw focus gearing and 80mm front.

Lens Composition: 6 elements, 4 groups

Minimum Focus: 0.24m (10 in.) @1:1

Aperture Range: T3.2 - T22

Lens Mount: PL mount (BNCR will be available on request)

Filter Size: 80mm slip-on

Size: 90mm (3.5 in.) **Weight:** 650 gr.

PRICE: \$6,995.

OPPENHEIMER-ZEISS MAKRO-PLANAR® T* 100mm T3.2 LENS

A high performance telephoto macro lens developed basically for close-up photography. A floating element ensures uniform and high image quality over the whole focusing range. Large magnification ratios up to life size (1:1) can be obtained without an extension tube while maintaining distance from the subject. The lens is complete with integral long-throw focus gearing and 80mm front.

Lens Composition: 7 elements, 7 groups. Correction of aberation at close range with "floating elements"

Minimum Focus: 0.41m (16½in.) @1:1

Aperture Range: T3.2 - T22

Lens Mount: PL mount (BNCR will be available on request)

Filter Size: 80mm slip-on

Size: 105mm (4.1 in.) **Weight:** 850 gr.

PRICE: \$7,495.
